

# We transform your ideas into print

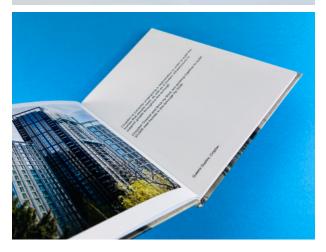

Do spend a few minutes looking around the portfolio on our website to see what can be achieved and what the winning solutions were from previous years' students:

https://www.exwhyzed.co.uk/portfolio/

\*All of the examples you see in this guide and on our website were printed by Ex Why Zed. We don't show off computer generated images of make believe projects like the other companies do. We *actually* print great work rather than just imagining we do:)

Print your FMP with Ex Why Zed and gain top marks!

#### \* \* \* \* \*

I was looking to have a custom size magazine printed for my FMP for university. These guys not only provided that but the paper options were incredible. they talked me through the whole process, along with their online instructions, which made the process extremely simple.

The turn around was extremely quick and I was even sent more copies than what I'd ordered. I've already recommended these guys to my friends at Uni and would highly recommend to anyone else looking for high quality print work at a reasonable cost.

Sean Regan

### 12 reasons why you should trust Ex Why Zed with your next project...

- We have been printing end of year University projects for 17 years so we know what works.
- Refreshingly responsive, friendly and patient customer service.
- Fast, deadline beating turnaround times.
- Free delivery anywhere in the UK. We regularly ship worldwide too.
- Free paper sample packs.
- Print 1 copy or more.
- · Bespoke sizes and wow factor add ons.
- The highest quality Indigo digital and litho printing.
- Over 400 superb reviews on Trustpilot. People love what we do.
- Step-by-step print journey to guide you through the process.
- · Super informative and helpful showcase video guides.
- Pssst...we'll even show how to prepare print ready artwork.

An online company with real people:)

If you want to see a masterpiece, you go to the Tate. If you want to see a great goal, you go to Wembley. If you want to print a high quality Final Major Project, you go to Ex Why Zed.

We are lucky to have printed FMPs for students from:

UCA

We are just at the end of the phone, email and live chat to answer your questions\*.

We are not a faceless internet printer who takes your file then disappears.

\*(Hey, even zoom too if you want?).

#### \* \* \* \* \*

The process was incredibly easy from beginning to end. I contacted Ex Why Zed to print my Final Major Project and they were absolutely brilliant. It was easy to ask for quotes and paper samples. The guidelines were easy to follow and they were great for replying to all my questions!

My FMP looks fantastic and I honestly can't think of anything negative about my experience. I would highly recommend Ex Why Zed and will definitely be using them when I next need some high quality printing. Thanks so much!

Hannah McNay

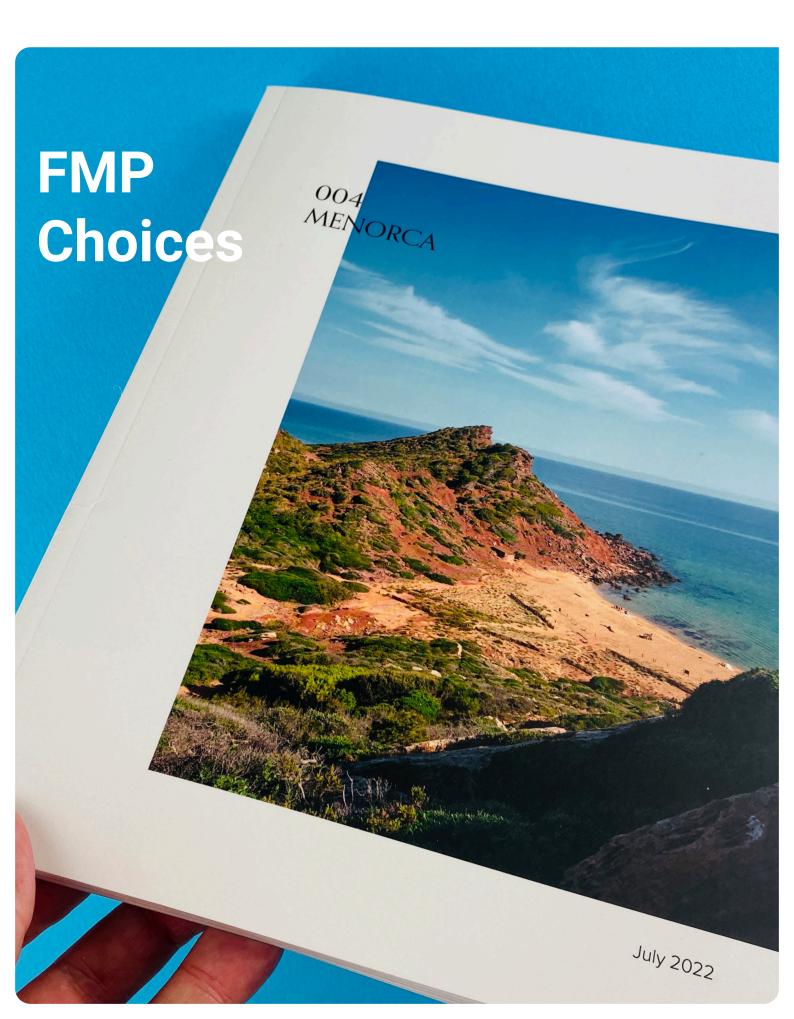

# If we promise you a delivery date we WILL achieve it.

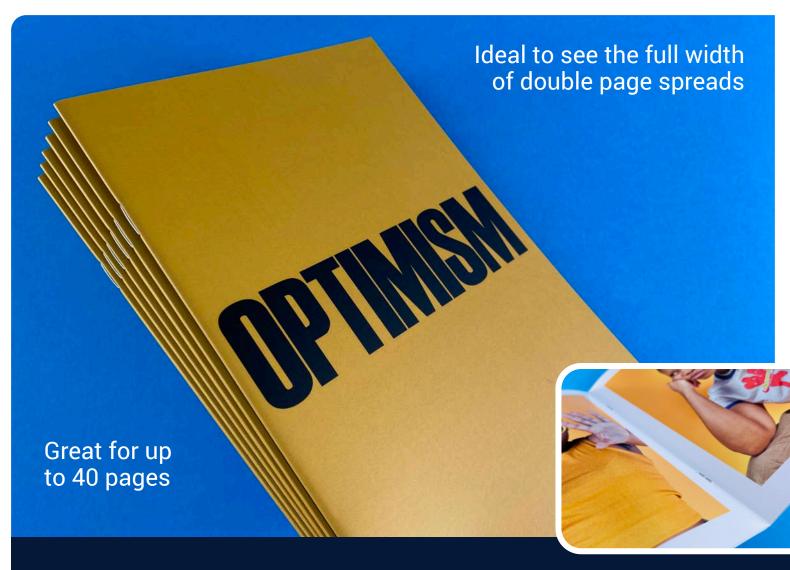

There are plenty of super cheap online companies who promise the world on their websites, take days before they even reply to your emails and when the work fails to arrive for your deadline, they will tell you the turnaround dates were "just a guide and not guaranteed".

# WIRE STITCHED (Staple bound) FINAL MAJOR PROJECTS

• The printed sheets are folded in half then bound with two staples on the spine.

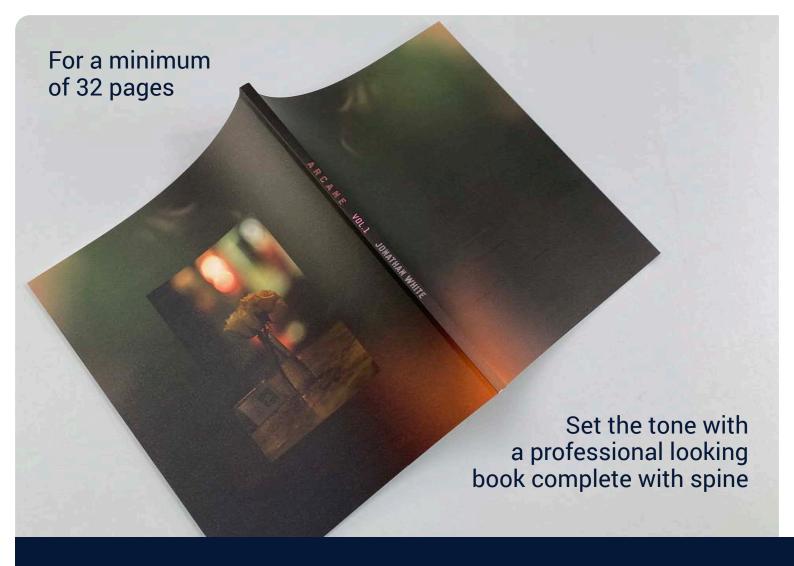

· We need a minimum of 8 pages.

- Wire stitching works best for up to 40 pages but if you don't mind some bounce on the cover, then you *can* go up to 52. 52 max.
- It creates a booklet or magazine aesthetic at a cost-effective price.
- The number of pages must be a multiple of 4 (so 12,16,20,24,28).

Print 5 copies of a 24 page A5 Wire Stitched FMP for \$48

Delivered in 4 working days.

### PERFECT BOUND FINAL MAJOR PROJECTS

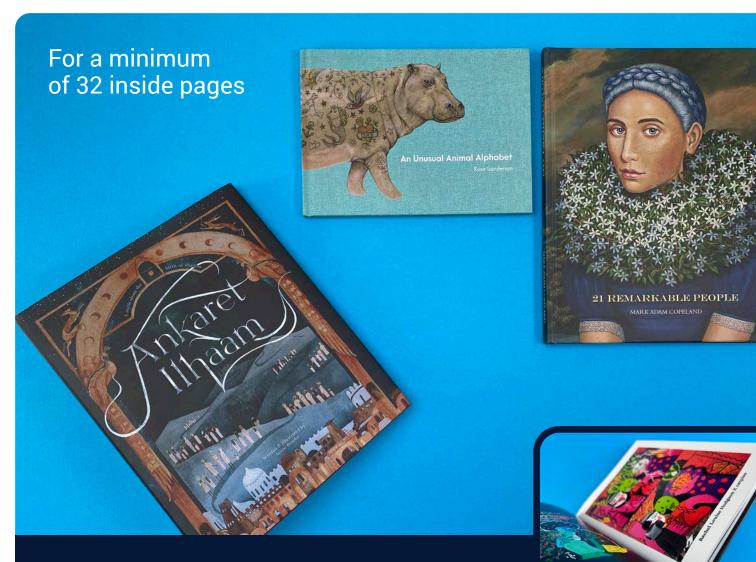

• Ideal for 32 pages or more because we need the inside page block to be at least 3mm thick. However, perfect binding works best with 40 pages or more. Print 5 copies of a 40 page A4 perfect bound FMP for £70.

Delivered in 5 working days

- Supply us with two PDF files:
- 1. The cover spreads including spine.
- 2. The inside pages in reading order.
- You can add content down the spine.
   Maybe your name or the book's title?
- Click below for our guides on setting up perfect bound book covers.

>>>Video Guide >>>Illustrated guide and instructions

# HARDBACK (Case bound) FINAL MAJOR PROJECTS

A super impressive publication with a hardback cover.

- You need an absolute minimum of 32 inside pages. (For less than 32, choose wire stitching).
- The file set-up process will be new to you, so allow extra time.
- Print your own artwork on the cover OR choose a material from Winter & Company then add a title in foil (this adds £460+ to the total cost).

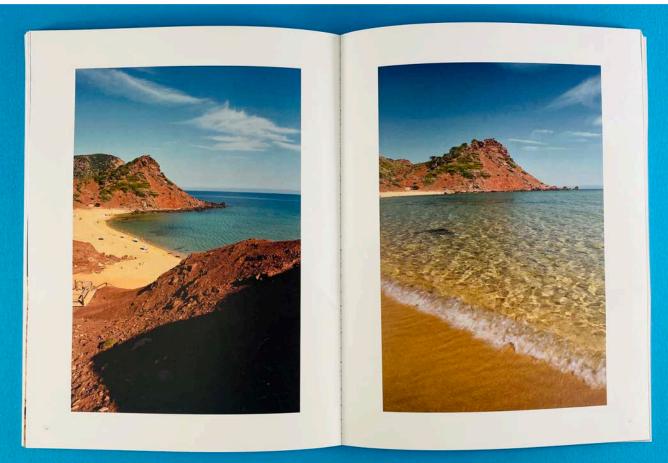

#### Sizes Available:

- Portrait: From A6 up to A4.
- Landscape: From A5 up to A4.
- Square: 148x148mm to 294x294mm.

Print 5 copies of a 40 page A4 Hardback FMP for £171.

Delivered in 7 working days

A smooth paper with a slight sheen and great for colour reproduction.

### The Basics

- All of our FMPs are printed in full colour. If you would like black print only, that's fine too but it will be the same price. 'Full colour' is also referred to as 'four colour printing' because we use Cyan, Magenta, Yellow and Black ink. These four colours then mix to make up the millions of colour combinations your artwork will contain.
- You can have full bleed images on every page, this is no extra charge.
- Delivery to one UK address is FREE.

We do also ship internationally and exported shipping is charged at our cost from the cheapest courier on the day.

- FMPs do not have any vat on top so our prices shown are the total price.
- As you have seen on the previous pages, there are **three binding methods to choose from**: wire stitching, perfect binding and hardback (case bound).
- Over the page you'll see our price spreadsheets. The number of pages is listed as 4+16pp that indicates 20 pages in total. Your 4 page cover *plus* 16 inside pages. We call it a 'four page cover' or '4pp Cover' because four of your pages will be printed onto a thicker card. These are the front cover, the inside front cover, back cover and inside back cover. So, if you have 20 pages in total, then you need to look at the 4+16pp prices. 32 pages would be 4+28pp, 44 pages would be 4+40pp etc etc.
- Our guide shows prices for A5, A4 / 210x210mm and 240x170mm FMPs. However, do feel free to design your publication at any bespoke size up to A4.

Email us on hello@exwhyzed.co.uk or call on 01206 766647 for quotes on 240x170mm Landscape and all other bespoke 'Non A' sizes.

#### Do I need lamination on my cover? The short answer: when paper is printed, the ink sits on the surface. When it is then folded to make your cover, the ink can crack.

While you should never judge a book by it's cover, this cracking will look unprofessional.

Lamination is a thin layer of protection which prevents the ink cracking. Win win. It comes in a matt or gloss finish.

### How to use our Price Lists

First up, choose the correct price list for your size and binding type.

- 1. A5 Wire Stitched
- 2. A5 Perfect Bound
- 3. A4 Wire Stitched / 210x210mm
- 4. A4 Perfect Bound / 210x210mm
- 5. 240x170mm Wire Stitched
- 6. 240x170mm Perfect Bound
- 7. A5 Hard Back
- 8. A4 Hard Back

#### **Example Work Flow:**

1.You are printing an A5 Wire Stitched booklet. So start by choosing that spreadsheet. 2.You would like a 300gsm silk cover with 130gsm silk inside pages so choose the top section. 3.There will be 24 pages so scroll down to the 4+20pp row. 4.You are thinking of 5 or 10 pages so read across to see 5 copies at £48 or 10 for £56. EASY!!

#### **Helpful Notes:**

A5 Portrait and A5 Landscape are the same price.

Pricing, production and technical notes to digest and consider when choosing your print spec.

Choose your paper finish: Silk, Gloss or

Uncoated.

Silk and Gloss are the same price. Choose from matt or gloss for your cover lamination Cover 300gsm Silk. Inside Pages 130gsm Silk 100 50 42 4+12pp 48 62 70 88 118 4+16pp 62 105 42 48 74 134 4+20pp 42 48 62 78 114 146 4+24pp 42 56 62 82 124 162 4+28pp 42 48 56 70 86 133 178 42 4+32pp 44 48 56 78 96 136 186 4+36pp 42 44 48 56 84 104 147 210 4+40pp 48 112 216 58 90 156 44 42 48 117 157 4+44pp 98 225 4+48pp

All prices include delivery by next day courier and cover lamination.

<u>3.</u>

Scroll down to the number of pages in your FMP.

Four pages will be printed on to a thicker card - front cover, inside front cover, inside back cover and back. We call this a 4 page cover, "4pp". So if your book has 40 pages in total, use the 4+36pp prices.

|        |    | 2  | 5  | 10 | 20  | 25  | 50  | 100 |
|--------|----|----|----|----|-----|-----|-----|-----|
| 4+8pp  | 42 | 44 | 48 | 58 | 62  | 66  | 78  | 99  |
| 4+12pp | 42 | 44 | 48 | 58 | 62  | 70  | 82  | 115 |
| 4+16pp | 42 | 44 | 48 | 58 | 62  | 74  | 92  | 133 |
| 4+20pp | 42 | 44 | 48 | 58 | 62  | 78  | 103 | 145 |
| 4+24pp | 42 | 44 | 48 | 58 | 74  | 86  | 113 | 161 |
| 4+28pp | 42 | 44 | 48 | 58 | 84  | 98  | 122 | 177 |
| 4+32pp | 42 | 44 | 48 | 58 | 88  | 103 | 131 | 194 |
| 4+36pp | 42 | 44 | 48 | 62 | 96  | 109 | 135 | 213 |
| 4+40pp | 42 | 44 | 48 | 66 | 104 | 114 | 145 | 218 |
| 4+44pp |    |    |    |    |     | 121 | 153 | 234 |
| 4+48pp |    |    |    |    |     | 125 | 161 | 248 |

Read across to the number of copies you are printing.

#### Can I mix paper types?

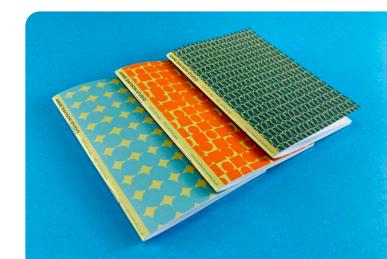

Yes. For example, you could have a silk cover and uncoated inside pages. Use the Uncoated prices. Or you could have an Uncoated cover and gloss inside pages, again use the prices shown for Uncoated.

#### Do you offer student discount?

Our prices in this guide are heavily subsidised to help you out. We also offer FREE delivery, FREE paper sample packs and you can add more pages for FREE (notice in a lot of instances the price for 40 pages is the same as 12)...so add more content!

## **A5** Hard Back

**Notes:** All prices include delivery by next day courier and cover lamination. A5 Portrait and A5 Landscape are the same price.

Silk and Gloss are the same price. The prices shown are for unprinted end papers, add 5% for printed.

For material covers, choose from the range at Winter& Company. Visit winter-company.com/ These add £200 to the price (1-100 copies)

Material covers are not printable but look great with a foiled logo, title or your name. This adds a further £280 to the prices shown below.

| 200pp text   | 20mm spine |                | 330 | 331 | 383 | 435 | 570 | 647 | 990 | 1612 |

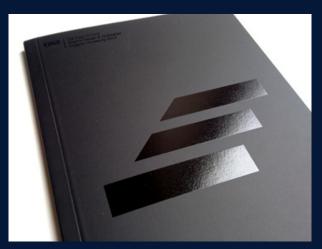

# For the bigger budgets

There are plenty of added extras and finishes we can add to your FMP to challenge convention and make your publication unique. Generally they add *hundreds* to the price and 1-2 weeks on the time.

Neenah Environment is a good choice for a brown/kraft cover. Paper mill GF Smith has a range of 200+ papers. Expect these to add an additional £100 *minimum* to the total cost.

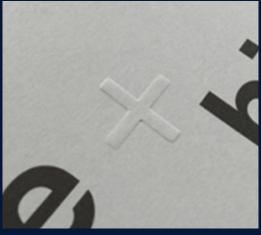

Gloss Spot UV Varnish on a matt laminated cover makes a logo or title shine in light. Adds +£280 to the cost.

Foiling is perfect to make a title, your name or a logo sparkle. There are 100s of colour choices not just gold or silver. Add +£280.

Debossing is the process of pushing content into the paper. Add +£280.

Conversely, embossing pushes content towards the reader. Again, it adds at least £280.

## Bigger budget hack

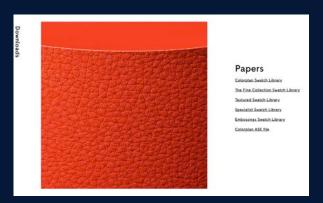

On small quantities (under 400 copies), the most cost efficient way to achieve a coloured background on your pages is by printing that colour onto one of our white 'house' papers.

This is much, MUCH cheaper than using Colorplan or a premium coloured sheet.

Brilliantly, there is another hack for this. Shhh, don't tell everyone but on the G. F Smith website they have downloadable high res close ups of their papers.

You can download these then drop that image in as the background on your InDesign artwork to give the appearance of coloured, texture paper/card. Easy!

https://www.gfsmith.com/download

To give the appearance of a textured material cover, then try the Winter&Company website https://www.winter-company.com/en/products-a-z/

Choose the range you like:

Wibalin Natural is a good smooth, coloured choice.

Wibalin Buckram is a textured, linen like coloured choice.

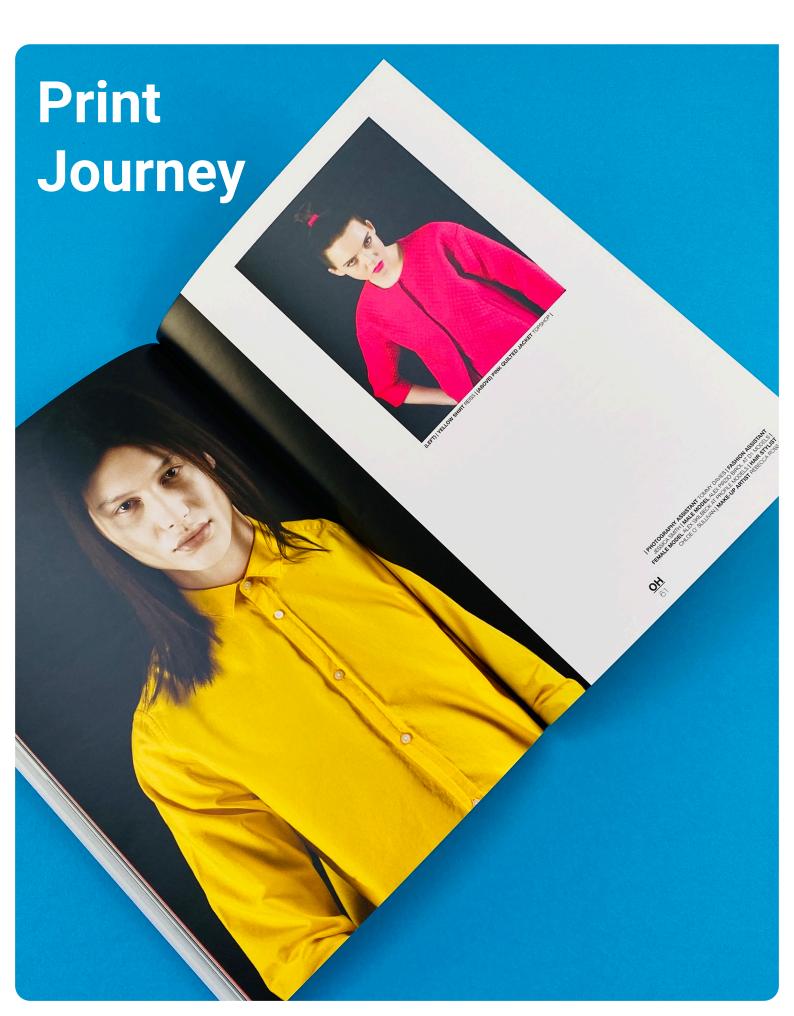

But there are 100s of other options so do have a scroll through.

Click the image in the centre at the top of the page (it has 1cm written underneath it) and a large, full screen preview will appear which you can screen grab then drop in on your artwork.

# 1.Blast off!

Enjoy looking through our website portfolio, resources and the video showcases on our YouTube channel.

Decide on your chosen print spec, then use our fun spreadsheets in this guide to find your price.

# 2.Let's talk

Remember actual conversations? Well, at Ex Why Zed we are happy to discuss the quote, file set up and anything else you are just wondering.

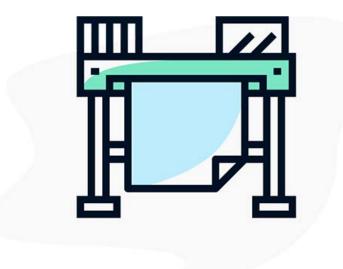

Find us on the phone, email, live chat and Zoom. You will speak to an expert who actually knows about printing.

## 3. This is the fun bit

Turn your brilliant idea into a print-ready PDF. Use our portfolio, illustrated set up guides, videos, Pinterest boards and product pages for inspiration on design layout and ideas.

Ping over the finished pdf (using wetransfer.com) and our team will give it an attentive preflight check.

# 4.Time for some Ex Why Zed magic

Once the artwork is perfect, we will book your job in.

Now is the time [cue drumroll]...for us to transform your ideas into print!

# 5."It's here, it's here!"

In no time, there is a knock at the door and you experience that magical moment of opening the boxes and there it is YOUR PRINTING.

Congratulations, you really did it!

Now to show the world what you've been up to.

# File Set-Up

#### First up...

All of our website's guides on file set-up are for Adobe InDesign which you can get on a one-week free trial (click here).

InDesign is the industry standard for page layout so if you learn it now it will form a solid addition to your C.V and will stand you in good stead when you move into industry after University.

**However**, as long as you can export your finished work to a high res PDF, do feel free to use your favourite program. The same principles and guides still apply when preparing your layout reagrdless of the program you are using.

Other options are Affinity Publisher, Quark Express, Illustrator, and even Microsoft Word or Publisher. Canva is great for on screen work but tends to cause problems when exporting for print and Scribus is one to avoid - it is not fit for purpose.

If you cannot set up your artwork, do ask, we have a wealth of print knowledge and if it is a simple fix we will do our best to help.

Our guides are thorough but helpful and accurate. If you read and follow them, your artwork will be correct and print ready.

#### \* \* \* \* \* \*

I was extremely satisfied with our finished prints (five perfect bound books of +150 pages each). If your concern about using an online printer is not being able to talk to the print shop/a human being in person (as I was), fear not! ExWhyZed was very good about checking image resolution and confirming layouts before going to print. They we're also very quick- we submitted our final approvals Monday and had our finished prints delivered by Thursday. Very pleased, and I look forward to printing our next term portfolios with them again soon.

Cass Osterman, Architecture student.

### Why supply the files correctly?

We appreciate your deadline is tight so supplying correct artwork means your job can go straight on the press and be delivered when you need it.

Incorrect artwork causes delays while changes are made. At FMP time, everyone's deadline is super crucial so the only fair way to deal with the work is to print it in the order it arrives.

It takes us 5 working days to print, trim, bind, pack and deliver a set of perfect bound books. So if you send us the PDFs 5 days before your deadline but it is not right and it then takes 3 days of backwards and forwards between us to sort out the PDFs that only leaves 2 days before the deadline. We cannot print, trim, bind, pack and deliver a set of perfect bound books in 2 days.

Let's work together to get the files correct first time.

### A polite request to tutors

Setting hand in deadlines that are the day after a bank holiday is really not ideal for anyone. The students will have worked hard to produce a project that does them justice but couriers will be able to deliver on the Saturday, Sunday or Monday before the Tuesday hand in. That just causes a frantic rush for them to finish their work **11 days** earlier on the *previous* Friday so we can deliver on the Friday before the bank holiday weekend. In some cases, 11 days earlier simply isn't possible because you will still be having crits and finalising content.

Equally, there are instances where we have shipped the work in time but for one reason or another (understaffing, driver strikes, petrol crisis, traffic accidents, unforeseen weather) the courier fails to deliver in time for the student's deadline. This is absolutely not their fault or ours so leniency and an extenuating circumstances extension would be a friendly option here.

## Wire Stitching set-up

We know your time is precious so when you come to prepare your artwork definitely take 5 minutes to read through our step by step file set up pages. The illustrated guides make the process super easy and will answer 99% of the questions you may have.

#### Click the link below to view our full, illustrated guide.

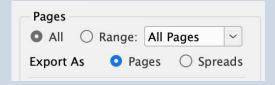

### https://exwhyzed.co.uk/resource/wire-stitching-set-up-guide/

#### The basics:

Files for wire stitched FMP pages are set up in correct reading order. The first page is your cover, the last page is your back cover, the pages in between are in correct reading order just exactly as though you were flicking through the finished booklet. Simple.

They need to be supplied as single pages NOT spreads. Our system will then sort the single pages into imposed printer's pairs so all you need to worry about is getting the pages in the same order as you want people to read them.

Choosing this option when you export will create a PDF a single pages not spreads:

#### Wire Stitching Set Up Checklist

- 1. We need one hi-res pdf with a 3mm bleed on each edge and CMYK images.
- Pages should be supplied in correct reading order: 1st page is your cover, 2nd page the inside cover etc right through to your back cover.
- 3. Your total number of pages must be a multiple of 4 (8,12,16,20,24,28 etc).
- 4. The artwork should be the same size you want your printed booklet to be.
- 5. Pages nearer the centre of the booklet are trimmed shorter (this is called creep)
  - keep important page numbers and info away from edges.

# Perfect binding set-up

We know your time is precious so when you come to prepare your artwork definitely take 5 minutes to read through our step by step file set up pages. The illustrated guides make the process super easy and will answer 99% of the guestions you may have.

### Click the link below to view our full, illustrated guide.

https://exwhyzed.co.uk/resource/perfect-binding-set-up-guide/

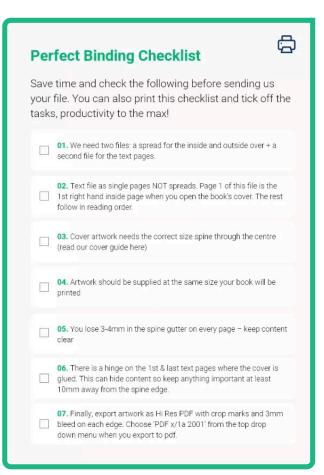

#### The basics:

For perfect bound books we need two files: A cover file and a text page file.

#### 1. A hi res PDF file for the cover and inner cover.

This is a two page PDF - a spread for the outer cover and a spread for the inner cover. The outer cover has the back cover on the left, spine through the centre and front cover on the right. The inner spread has the inside front cover on the left and inside back cover on the right. The width of the spine depends on how many pages your book has – it's simple but the more pages, the thicker the spine needs to be to wrap round them all. Here is a quick video guide to help set up your cover.

**2.** A file for the text (inside) pages supplied as single pages rather than spreads and in correct reading order with crop marks and 3mm bleed on each edge.

We have listed a few of the common spine sizes below to give you an idea of your book's thickness.

#### Text pages onto 115gsm Uncoated

36pp to 42pp Text = 3mm spine
44pp to 58pp Text = 4mm spine
60pp to 72pp Text = 5mm spine
74pp to 88pp Text = 6mm spine
90pp to 102pp Text = 7mm spine
104pp to 118pp Text = 8mm spine
120pp to 134pp Text = 9mm spine
136pp to 148pp Text = 10mm spine
200pp Text = 14mm spine

#### Text pages onto 130gsm Silk

36pp to 40pp Text = 2mm spine
44pp to 52pp Text = 3mm spine
54pp to 70pp Text = 4mm spine
72pp to 88pp Text = 5mm spine
90pp to 106pp Text = 6mm spine
108pp to 124pp Text = 7mm spine
126pp to 144pp Text = 8mm spine
146pp to 162pp Text = 9mm spine
200pp Text = 12mm spine

# Hardback binding set-up

We know your time is precious so when you come to prepare your artwork definitely take 5 minutes to read through our step by step file set up pages. The illustrated guides make the process super easy and will answer 99% of the questions you may have.

Click the link below to view our full, illustrated guide.

https://exwhyzed.co.uk/resource/hardback-book-set-up-guide/

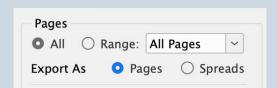

Ultimately, to print your book we need four files please.

File 1. The outer cover file is a flat spread.

The outer cover file is a flat spread based on our hardback cover guide which you can download on the link above. There will be a spine through the centre - the size is dependent on the number of pages you have. The cover file is slightly trickier for a hardback book because you have to include scope for the sections which are folded round the spine and the extra flaps that tuck round the hard back case. On our guide, the green areas are the flat panels of the book cover and spine so should contain your main cover artwork. The purple areas will be on the folds or partially hidden sections when the cover is glued on so keep any important information out of them. The purple areas work best as a continuation of your background colour or image if you have any since they are partially visible. This video guide depicts this a little more clearly: https://youtu.be/Hpp9BvKOX7Q

Files 2 and 3. If you would like the endpapers printed then you could supply a pattern or solid colour for those.

**File 4.** The inside pages - your main content. This is supplied as single pages rather than spreads and in reading order. Choosing the option below will create a single page PDF.

Being honest, if you haven't set up artwork for a hardback book before this will take a few hours. So as we've said many times, allow enough time.

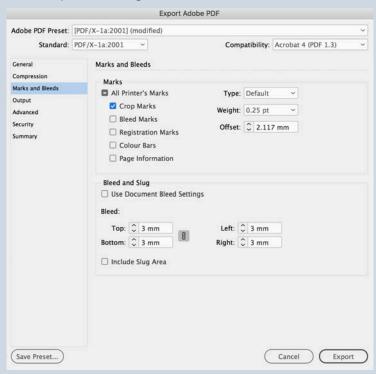

# General file set-up requirements

# To go ahead we'll need hi resolution PDFs with 3mm bleed and crop marks.

\*This is in red for a reason:)

All files need to be saved as PDFX/1A:2001 when they are exported. You can choose PDFX/1A:2001 from the top drop down menu when you export to PDF. Then in the 'Marks and Bleeds' menu you not only tick 'Crop Marks' but you also add '3mm' in to the four bleed boxes - top, bottom, inside and outside. This will add the bleed to the exported PDF.

Your export settings should look like this:

To ensure the bleed shows up on the PDF make sure you have dragged any background image or colour out 3mm beyond the black line on your InDesign file into the bleed area. This sets the bleed up and ensures there wont be a white border on your pages.

For general advice on preparing images, bleed and file set up take five minutes to read through: http://www.exwhyzed.co.uk/resources/file-set-up-guide/

# General file set-up continued

#### Bleed.

If you haven't printed anything before then there is a high likelihood that you will not know what bleed is or why it is required.

Here is a clear and helpful short 6 minute video to explain the process:

### https://www.youtube.com/watch?v=eFBD-2\_ewW8

Please do watch it because 90% of FMP files arrive without bleed and this will help you get the PDFs correct first time round.

You need to add 3mm bleed on the file in Adobe InDesign (or your chosen layout program), then include it on the exported PDF.

#### The PDF should look like this:

Note the artwork goes beyond the crop marks and the 'Trimmed Page Edge'.

#### And not like this:

Note the artwork stops AT the marks and leaves a white space around it.

## We'll repeat that....

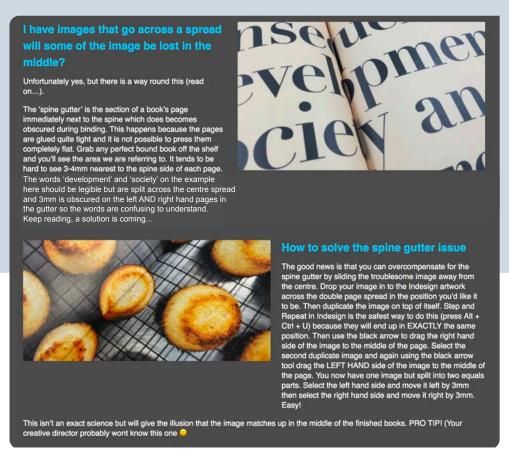

Please do watch the 'bleed' video above because 90% of FMP files arrive without bleed and this will help you get the PDFs correct first time round and mean we don't lose time.

# General file set-up continued

Double pages spreads in a perfect bound book where the image crosses the middle.

You tend to lose 2-3mm in the spine gutter on each spread of a perfect bound book that is partially hidden.

Best to keep any important text or content at least 6-8mm away from the spine side of the page. However, for images, we have a hack where you chop the image into two then move the left hand half left by 2mm and the right hand half right by 2mm. Read more below:

#### Your InDesign work flow should look like this:

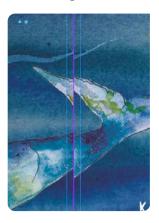

Pre image split (2-3mm either side lost in the gutter)

After split, the two halves are nudged outwards and away from the centre

Inner handles of image box dragged back to the centre line using the black arrow tool

# General file set-up for photo FMPs

#### **RGB vs CMYK images**

If your images were originally taken on a camera then they will likely be in the RGB colour space (Red, Green and Blue). All commercial printers print using CMYK ink (Cyan, Magenta, Yellow and Black). Annoying, but it is the way it is.

Unfortunately RGB images viewed on your backlit screen are never going to be the same as when printed on paper in CMYK ink. It's just impossible to achieve that and no printer could. You will have to allow for some difference in the colours between the two mediums but having something tangible in your hands and seeing the images on paper gives the publication a charm that just sending out a PDF wont.

So, at some stage the images need to be converted.

Good news, we can convert them all here to CMYK with one click. It is important to note, they will print differently in CMYK than how they appear on screen.

For more control over this, you can convert them on your computer then boost the contrast, colour balance and brightness afterwards in Photoshop to ensure you're happy with them.

So the quick fix, if we convert them here or the more thorough fix if you do them one by one in Photoshop then tweak afterwards.

#### **Black / Greyscale Images**

It is very hard to print black and white photography effectively in CMYK.

It is tricky and creates problems. You do need to accept that printed images WILL NOT look like they do on a monitor, but in turn, how they look on screen is not what the scenes looked like in real life either.

If we print the photos in colour, they will have a colour tinge, however if you convert them to greyscale then they will look flatter than they do on screen. Neither of these is a print error and the photo will have been printed exactly how they should be based on the artwork supplied. We are being honest, because there is no way around this issue. That said, our intent is still to print you an impressive-looking book.

# FAQs: Orders

### How long does it take?

Wire stitched booklets will be delivered in 4 working days.

Perfect bound books 5 working days.

Hardback books 7 working days.

These are the time frames after you send us PRINT READY artwork. What do we mean by print ready, well have a flick back a few pages for an illustrated guide. If you need delivery in 5 days but you send the artwork incorrectly set-up and we then lose a few days going backwards and forwards for two days sorting it out (for example adding bleed or making technical changes to the files) then your deadline will be missed. The message we're trying to get across is PLEASE ALLOW MORE TIME.

The turnaround times shown are the absolute minimum we require. If you have an urgent deadline take the stress out of it for both parties and send the print ready artwork early.

### Can I pay extra for faster service?

This isn't something we really do. We know there are flash points during the year where deadlines become super important - University hand ins are one of them. So, at this time we print the orders in the sequence they come in. This is the only fair way to do it. If there is an important deadline looming, allow more time to avoid the printing being rushed.

### Can you do it quicker?

This isn't our first rodeo and the times we have listed above are realistic. Ink and glue does take time to dry. There will be other jobs already lined up to go on our press so the process isn't as fluid or simple as us receiving your files and printing it 2 minutes later.

### I have never done this before, will you check my artwork?

YES. We always carry out preflight checks before just going ahead and printing FMPs to check you have 3mm bleed, that the artwork is the same size as you've asked the publication to be, that you have the correct number of pages to make a book (has to be an even number), that the cover has the correct size spine (if it's perfect bound) and that your image aren't lo resolution..

## How do I send you the artwork?

When your artwork is finished and ready to go...jump on www.wetransfer.com to upload the files sending them to us at hello@exwhyzed.co.uk

To save time, in the comments box remember to let us know all the information we need to book the job in - the number of copies you're going for, the specification you have chosen and where you would like us to deliver the job to. We'll then give your artwork a free preflight check to highlight any potential issues and will email with any advice or recommendations before going to production.

# **FAQs: Pricing**

#### How much will it cost?

We have included our pricing spreadsheets in this guide. I'm sure you've all used a spreadsheet before but for those who live in a spreadsheet black hole then pick the correct spreadsheet for the size of your FMP (A5, A4 / 210x210mm or 240x170mm), select the binding method you'd prefer (40 pages or under should be stapled, 32 pages or over can be perfect bound, 32 inside pages upwards can be bound as a hardback book) and the chosen paper type you'd like. Once on the correct page find the number of pages you have down the left hand side then read across to see the price for the number of copies you will be printing. Easy!

### Do the prices include delivery?

Yes, delivery is FREE to one UK address. Books and booklets are zero rated for vat so the price you see is the price you pay. You'll find a lot of other printers who sneak this on at the checkout and suddenly their prices aren't as cheap as you thought and of course, they haven't been anywhere near as heloful as we have:)

### Do you offer student discount?

Our standard FMP print prices are heavily discounted to help with student budgets.

Offers we do provide are...

- FREE delivery.
- FREE file checking.
- FREE page quantity upgrades. You will notice from our spreadsheets you can add many more pages and the price doesn't change. For example...A5 stapled booklets, on 1-5 copies, you can choose 12 or 40 pages for the same price. So if you have 12 pages and need an extra 8 pages for more content, then it won't cost you more. On A5 perfect bound books (1 or 2 copies) you can choose any pagination from 32 pages to 154 for the same price. Yes, 32 pages is the same price as 154!!

### How do I pay?

Once we have checked your artwork we will send over an invoice for you to pay by online bank transfer or credit/debit card through Stripe.

### Can you send the book unbound?

No. We are sure you will create a great publication but we do not produce unbound work anymore. Frustratingly there's always a disconnect between the artwork people supply to us and how the binding process requires the sheets. Generally, this is because the sheets have been trimmed or folded when they shouldn't have been, the double page spreads don't match up or some other funky variation on the page layout being in the wrong order. These types of job do tend to go wrong every single time. Not even kidding, it is **every single time**. It just turns into a hassle for both parties and we know from experience that it always leads to us having to reprint the job for free. If you'd like us to print and bind your publication then we're great at that and we would be more than happy to help!

# FAQs: File Set Up

## How do I add bleed to my file?

This is the definitive video guide:

https://www.youtube.com/watch?v=eFBD-2\_ewW8

We promise if you follow this guide, the artwork will arrive correct first time round.

### I have added bleed but it doesn't show up on my PDF

It's one of two things (it is ALWAYS one of these two things):

- •Have you dragged the background image out 3mm beyond the black line on your InDesign file into the bleed area? Try that then export again.
- OR you have done the above but then when you're exporting you need to click the Marks and Bleeds menu, then type '3mm' into the four bleed boxes. This will add the bleed to the PDF.

Is full bleed more expensive? No :)

### What sizes can you print?

For cost-effective sizes keep your catalogue within A4 portrait, A5 landscape or 210x210mm square - these are the cheapest sizes to print. Of course, do choose the size that best fits your publication.

#### Wire Stitching:

The largest portrait size we can print on wire stitched booklets is an impressive A3 (420mm high x 297mm wide). Our maximum square size is 297x297mm. The maximum landscape size is 210mm high x 297mm wide.

#### Perfect Bound:

The largest portrait size is A4 (297x210mm), landscape is A4 too. A cost-effective square size is 210x210mm but we can increase to 297x297mm if your budget stretches.

#### Hard Back:

The largest portrait size is A4 (297x210mm), landscape it is A4 too. A cost-effective square size is 210x210mm but we can increase to 294x294mm if your budget stretches. Remember, these are the sizes of your inside pages. There is a 3mm overhang on the cover of a hardback book so if your inside pages are 297x210mm then the actual size of the finished book will be an impressive 303x216mm.

For bespoke sizes, email or call us for a quote.

# FAQs: Technical.

### **Should I laminate my cover?**

Always laminate your cover if you have any ink printed onto it. Without lamination, the ink **will** crack on the cover fold and this looks unprofessional. If you just have a white background on the cover then lamination isn't completely necessary but might still give the publication more protection and longevity.

# Do you make presentation boxes for the book to go in? We don't sorry.

### Can I add text down the spine of my perfect bound book?

Yes. Perfect bound books will be at least 3mm thick so there is room to add your title or name down the spine. If it is only 3mm then the text needs to be tiny tiny to avoid it slipping around the front or back cover. Don't make it 3mm or it will likely slide around.

If you are going for a larger number of pages then the spine size increase and makes adding content far more comfortable.

The spine on a hardback book will be at least 9mm and is fine to add some spine text.

## Can I print my FMP black and white?

Yes, do convert your images to greyscale in Photoshop before importing them to InDesign. All of our FMPs prices are for full colour printing. If you would like black print only, that's fine too but it will be the same price.

# Hey, what else can you print?

### Can you print our Degree Show Catalogues too?

Yes, we would absolutely love to and we specialise in those too!

Click the text below to check out our dedicated pages:

>>>Our portfolio of case studies.

>>>And also enjoy our mammoth two hour video guide.

We have been printing end of year show catalogues since the iconic Central St Martins Fine Art one we produced in 2009.

### **Business Cards**

We have curated a wide range of cards that are both impressive to hand over at an event and kind on your budget to print. **Take a look and download our Business Card guide from this page.** 

### **Postcards**

How about a set of postcards to leave on your graduate show stand for visitors to take away. A handy and cost-effective way to present yourself. Choose your favourite piece of work from the front and add your contact details and socials on the reverse - make it easy for potential employers to find you.

# **PRO TIPS**

If you go for wire stitching and choose a thicker inside paper, like 170gsm, then expect there to be some bounce on your booklet. Thicker paper doesn't stay as flat as 115gm or 100gsm does. Thicker inside pages work better on A4 booklets than they do on A5 because the size is larger so they are less rigid.

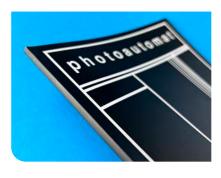

#### Should I laminate my cover?

Always laminate your cover if you have any ink printed onto it. Without laminate the ink will crack on the cover fold and this looks unprofessional. If you just have a white background on the cover then lamination isn't necessary but it would still stop dirty marks on the white areas.

Covers with lamination create a smooth finish and will arrive in pristine condition.

**Matt Lamination** 

**Gloss Lamination** 

Covers without lamination tend to scuff and crack.

# **PRO TIPS continued**

#### Printing onto Uncoated versus Silk or Gloss

When you come to artwork images for uncoated paper it's always best to keep them bright, punchy and full of contrast. Printing on uncoated paper looks and feels great as you've seen from our samples and portfolio but the ink does soak in flattening and softening shades. It is better to be safer and over compensate on the brightness of the images rather than lose content and details if the ink is absorbed into the uncoated finish.

To illustrate this please see below a set of images for a recent Lookbook job we printed. These are exactly the same files and artwork used for both however one is onto gloss and the other uncoated. If colour reproduction is crucial then we'd lead you towards a silk or gloss paper:)

Uncoated. Gloss.

A border looks great on screen but when it comes to trimming, they are tricky to get even.

This particularly applies to postcards and small borders around your book pages. Our best advice is, if you go for a border please can you make it AT LEAST 5mm but ideally bigger still and 8mm+.

# PRO TIPS continued

# How large should my How large should my text be?

- How large should my text be?
- How large should my text be?
- How large should my text be? Font sizes 18pt and larger are great for high impact headers.

- How large should my text be?
- How large should my text be? Slightly larger than average body text.
- How large should my text be? Another good option for a professional book, report or catalogue.
- How large should my text be? A go-to font size for book text. 10pt
- 9pt How large should my text be?
- How large should my text be? 8pt
- How large should my text be? Perfect for discrete captions in Photobooks and Art Catalogues How large should my text be?

230pt

# **Cover styling ideas**

You don't need to reinvent the wheel with your cover design, simple and clear content is often the best solution.

Choosing silk or gloss card with a matt or gloss lamination will give you a high impact cover. Go for uncoated for a tactile more muted appearance.

# Ready to place an order

Brilliant, you'll need to upload the files using WeTransfer. It is super easy, you don't need an account and it is free.

www.wetransfer.com

- 1. Add in your email address so we know who you are.
- 2. Add in hello@exwhyzed.co.uk as the recipient in the 'Email to' box.
- 3. Click the + to select the PDF files from your computer.
- 4. In the Message box, do remind us of the print spec you are going for, the number of copies and the best address for us to deliver to. We then have all the information to hand and it saves rooting through our email conversations to dissect it all.
- 5. We will then give your artwork a free preflight check to highlight any potential issues and will email any recommendations before going to production.
- 6. Finally, an invoice will be sent on email and once that is paid we go to print. Woop woop!

# Follow us on social media and enjoy looking through our previous work.

If you love your printing then do send us some pictures and your social media handles (IG, Twitter or Facebook). We'll promote it on our channels to get an extra 5000 eyes on your work.

Or post some pictures, tag us in and we'll regram or retweet.
